ReliefLink: Mobile Donor App Video Recording Script

Dedicated Shot-by-Shot Production Script for Donor Experience & Mobile Transparency

Target Video Duration: 6 – 8 Minutes

Platform: Flutter Mobile (Android / iOS / Web Preview)

Test Donor Account: ikathpie3@gmail.com

Key Demonstrations: PayMongo QR Ph, 5s Sync, Blockchain Hash, 'My Contributions'

VIDEO INTRO: THE DONOR'S PERSPECTIVE

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Visual: Start screen recording focused on mobile phone frame or centered emulator.
Opening Action: Display ReliefLink App icon on phone screen, then tap to launch.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Welcome to the official demonstration of the ReliefLink Mobile Application. In this video, we will walk you through how everyday parishioners and donors experience 100% transparent giving—from initiating an automated cashless donation via PayMongo, to inspecting cryptographic blockchain transaction proofs, and tracking exactly which community relief events their money helped fund."

Scene 1: Cold Boot & Animated Splash Screen

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Launch app from clean state.
Visual: Show the animated ReliefLink emblem and 'Sto. Domingo Parish Relief & Donation System'. Transition to Login.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"We begin with application launch. ReliefLink initializes our theme, validates local encryption keys, and provides a sleek, modern splash experience."

Scene 2: Donor Authentication & Session Persistence

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Tap password eye toggle. Enter ikathpie3@gmail.com and password. Tap 'Login'.
Visual: Show smooth login transition as JWT token is issued and stored in device SharedPreferences.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"On the Login Screen, parishioners authenticate securely using industry-standard JSON Web Tokens. The app features client-side input validation and persistent session storage, so donors remain securely signed in."

Scene 3: Personalized Home Dashboard & Elastic Momentum Physics

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Drag and scroll up/down on the Home screen to demonstrate BouncingScrollPhysics and drag-to-scroll support.
Visual: Point out dynamic greeting, 'Support Sto. Domingo Church' Hero banner, and KPI cards: **TOTAL DONATED: ■160.00**, **TRANSACTIONS: 7**.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Here on the Home Dashboard, the donor is greeted personally. Notice the fluid scrolling: our custom AppScrollBehavior implements bouncing elastic physics and multi-device drag support. Parishioners see their cumulative giving footprint—■160.00 across 7 transactions—keeping the main screen clean and focused on quick navigation."

Scene 4: Destination Earmarking & Preset Amounts (Donate Tab)

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Tap the prominent centered **Donate** button on the bottom navbar.
Visual: Open the Destination Selector. Show sectors (General Fund, Elderly, PDL, Scholars, Calamity). Select 'Parish General Fund'. Tap ■25.00.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"By tapping the centered Donate button, parishioners can give directly. Donors can specifically earmark their contribution for a cause—such as Student Scholarships, Indigent Feeding, or Calamity Aid—and choose preset chips or custom amounts down to the exact peso."

Scene 5: Automated PayMongo Cashless Checkout & Webhook Settlement

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Tap 'Proceed to PayMongo Checkout'.
Visual: Show the PayMongo checkout window supporting QR Ph, GCash, Maya, and Cards. Complete simulated payment and return to app.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"To eliminate physical cash risks, ReliefLink integrates PayMongo. Donors scan a standard QR Ph code using GCash or any mobile banking app. PayMongo webhooks notify our backend immediately upon clearance, automatically verifying the transaction without manual screenshot uploads."

Scene 6: Real-Time 5-Second Background Polling & Digital Receipts

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Tap **History** (Donation Summary) on bottom navbar.
Visual: Explain that a 5-second background timer syncs data silently. Tap on top verified donation (■25.00) to expand the itemized digital receipt.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"In the History tab, our 5-second background auto-refresh ensures any newly verified donations or disbursements appear in real time without screen flickering. Expanding any card reveals an official digital receipt containing reference codes, payment method, and timestamps."

Scene 7: Hyperledger Besu Cryptographic Hash & Tamper-Proof Verification

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Inside expanded receipt, scroll down to the blue **Blockchain Information** box.
Visual: Highlight the 0x... hash. Tap the **Copy** button to show 'Blockchain hash copied to clipboard!'.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Notice the Blockchain Information box: this hexadecimal hash starting with 0x is the cryptographic receipt mined directly into our Hyperledger Besu private blockchain. It serves as permanent mathematical proof that the donation was entered into the church's immutable ledger."

Scene 8: Reports & Transparency — Sticky Nested Header Architecture

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Tap **Donation Transparency** from Home.
Visual: Scroll down: demonstrate how the blue overview card smoothly collapses while the 3 tabs pin securely beneath the AppBar.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"In Reports & Transparency, our NestedScrollView architecture smoothly glides the overview banner out of the way while pinning the tabs, giving donors 100% of their screen space to audit parish records."

Scene 9: 'My Contributions' Utilization Gauge & Giving Impact Breakdown

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Under **'My Contributions'** tab, point out the progress gauge: **Disbursed: ■45.00 (28%)** vs **Cash on Hand: ■115.00 (72%)**.
Visual: Expand the ■25.00 card (General Fund) marked **FULLY USED** to reveal **GIVING IMPACT BREAKDOWN**: Event: *'Community Kitchen Feeding Program'*, Disbursed: ■*25.00*, Notes: *'Purchased warm nutritional meals for 15 children'*, Balance: ■*0.00*.
Show the ■30.00 card marked **PARTIALLY USED** (■20.00 disbursed for Typhoon Relief, ■10.00 remaining cash on hand).

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"This is the heart of our accountability system: under 'My Contributions', donors see exactly how much of their verified giving has been deployed to relief operations (■45.00) versus what remains safely in treasury reserves (■115.00).

Expanding a donation reveals the Giving Impact Breakdown: the donor sees that their ■25.00 was disbursed on October 14 for the 'Community Kitchen Feeding Program' to feed 15 children. Beside it, another donation shows 'Partially Used' for Typhoon Relief. Every peso is traced from deposit to active community impact."

Scene 10: Parish Bulletins Filter & Account Security Settings

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Tap **Announcements** (Tab 1), filter by category (Urgent Relief). Tap **Profile** (Tab 4), show settings and logout.
Closing: Conclude mobile video.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Finally, Module M7 delivers categorized church bulletins, and Module M8 gives parishioners full account control. This concludes the mobile donor demonstration of ReliefLink."
