ReliefLink: Web Admin Portal Video Recording Script

Dedicated Shot-by-Shot Production Script for Parish Administration & Prescriptive Auditing

Target Video Duration: 8 – 10 Minutes

Platform: React 18 / Vite Web Portal (Desktop Browser)

Test Admin Profile: Francis Arillo (Superadmin)

Key Demonstrations: Inflow/Outflow KPIs, Fund Disbursement, Prescriptive Analytics Engine

VIDEO INTRO: THE ADMINISTRATOR & AUDITOR PERSPECTIVE

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Visual: Start screen recording focused on full desktop browser showing ReliefLink Admin Login page (localhost:3000).
Opening Action: Presenter introduces the web portal's role in parish financial governance.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Welcome to the administrative demonstration of ReliefLink. In this video, we will walk you through the Web Administrative Portal, engineered in React and Vite for parish priests, finance councils, and ministry heads. We will demonstrate how parish officers oversee treasury solvency, disburse funds to relief operations, manage registered beneficiaries, and leverage our mathematical Prescriptive Decision Support Engine to allocate church resources scientifically."

Scene 1: Superadmin Authentication & Role-Based Access Control

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Enter Superadmin credentials (Francis Arillo). Click 'Sign In'.
Visual: Highlight the Superadmin badge on the sidebar. Explain the RBAC hierarchy: Superadmin, Admin, Staff, Viewer.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"We log in using our Superadmin profile. ReliefLink enforces Role-Based Access Control: parish priests and head finance officers hold superadmin privileges, ministry volunteers hold staff clearance for field relief distribution, while external parish auditors receive read-only verification rights."

Scene 2: Executive Solvency Dashboard & Inflow/Outflow Trends

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: On Dashboard tab, highlight the 4 top KPI cards: **Total Inflow: ■161,343.00**, **Total Beneficiaries: 171**, **Actual Aid Disbursed: ■18,923.00**, and **Treasury Reserves: ■142,420.00**.
Visual: Scroll past the Chart.js monthly trend charts and recent transactions audit table.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"The Executive Dashboard delivers real-time visibility over church solvency: tracking ■161,343 in gross community inflows, ■18,923 in disbursed community assistance, and ■142,420 in active liquid reserves across all ministries. Our reactive Chart.js charts map donation seasonality and relief outflow, allowing leadership to anticipate budgetary needs before crises occur."

Scene 3: Donation Management Ledger & Multi-Status Filtering

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Click **Donation Management** on sidebar.
Visual: Click through filter tabs: All, Pending, Approved, Cash on Hand, Partially Used, Fully Used, Canceled. Type Marie in search bar.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Donation Management provides an exhaustive registry of every contribution. Administrators can filter between Pending collections, Approved Cash on Hand awaiting deployment, Partially Used funds, and Fully Disbursed records. Canceled transactions are segregated, preventing non-cleared gifts from polluting treasury solvency metrics."

Scene 4: Executing a Relief Fund Disbursement & Dynamic Balance Recalculation

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: In Donation Management table, click on an approved donation (■30.00 General Fund). In the modal, click **Edit Status / Disburse**.
Form Inputs: Set status: **'partially used'**. Disbursed Amount: **20.00**. Purpose: **'Typhoon Relief Operation'**. Notes: **'Purchased 5 emergency relief food packs for affected families'**. Click **Save**.
Visual: Point out toast notification and show the updated remaining balance of ■10.00.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"When disaster strikes, the administrator opens the verified donation record and initiates a disbursement. Here, we select 'Partially Used', enter ■20.00 for the Typhoon Relief Operation, and log official notes confirming 5 emergency packs were purchased. The system executes our balance formula: original ■30.00 minus ■20.00 disbursed leaves exactly ■10.00 remaining cash on hand. The instant we click Save, this update syncs directly to the donor's mobile screen in real time."

Scene 5: Beneficiary Demographic Registry & Scholar Grant Renewal Matrix

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Click **Beneficiary Management** on sidebar.
Visual: Show the roster of 171 evaluated members across sectors (Scholars, Seniors/PWD, Indigent Families, Calamity, Livelihood). Click on the **Scholar Grant Renewal Matrix** to show how scholars are ranked by GPA, attendance, and community service hours.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Beneficiary Management organizes the parish's verified recipients across vulnerability sectors. For student scholars, we built a specialized Multi-Criteria Scholar Grant Renewal Matrix that tracks semester GPA, attendance, and church service hours to rank scholars objectively for tuition renewal."

Scene 6: Prescriptive Decision Support Engine — Urgency Weights & Allocation Gaps

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Click **Reports** on sidebar.
Visual: Highlight the top 4 cards: **OPTIMIZATION BASELINE (171 Members, ■161,343 Pool)**, **PRESCRIBED AID TARGET**, **ACTUAL AID DISBURSED**, and **REMAINING ALLOCATION GAP (■142,420.00)**.
Scroll through the table: highlight **Ministry Sector**, **Urgency Multipliers** (1.6x Scholars, 1.4x Indigent, 1.3x Seniors, 1.2x Calamity, 1.0x Livelihood), **Target Share**, **Prescribed Target**, **Variance / Gap (■30,222.00)**, and **Prescriptive Directive**. Point to the blue **'Manage Aid'** button.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"Now we arrive at the intellectual core of our platform: The Prescriptive Decision Support Engine.

Traditional church councils guess how to divide funds. ReliefLink replaces guesswork with mathematics. Our mathematical optimization model evaluates registered beneficiaries and weights them by societal urgency: a 1.6x multiplier for student scholars facing tuition deadlines, 1.4x for indigent nutrition, and 1.3x for senior healthcare. It then calculates the optimal prescribed budget per sector against our ■161,343 treasury pool.

*Notice the **Remaining Allocation Gap**: ■142,420 remains to be disbursed. The system generates explicit Prescriptive Directives—such as: 'Disburse ■30,222.00 to reach optimal 100% allocation for scholars'. By clicking 'Manage Aid', the administrator is guided directly to distribute funds and close the gap."*

Scene 7: Operational Expense Auditing, Document Archiving & Governance

■ CAMERA & SCREEN ACTION (WHAT TO SHOOT):

Action: Navigate through **Expenses**, **Documents**, **Announcement**, and **User Management** tabs.
Closing: Conclude web video demonstration.

■■ VOICE-OVER NARRATION (WHAT TO SAY):

"To complete our administrative suite: the Operational Expenses section allows the parish to record community supplies and outreach spending with attached receipt images for audit compliance. In the Documents tab, official financial certificates and vouchers are permanently archived. The Announcements system allows administrators to broadcast urgent calamity alerts and parish events directly to parishioners' phones. And finally, User Management gives leadership full control over staff access roles.

This concludes the administrative portal walkthrough of ReliefLink."
